## Entertainment Industry Private Exchange

PacFed Benefit Administrators (PacFed) has set the standard for the administration of fully insured private health insurance exchanges for more than 20 years.

The Entertainment Industry Private Exchange uses group purchasing power to provide employers access to California's most competitive and highest quality health benefit plans, as well as dental, vision and life coverage.

### Entertainment Production Company Plan

The California Entertainment Industry Plan is a group insurance program for television production and post production companies. Serving the entertainment industry for more than a decade, it currently provides coverage to more than 40 television production companies.

### Eligible Employers

To be considered for participation, the employer, studio and affiliated production company must have a minimum of fifty (50) full-time employees.

### Eligible Employees

To be eligible, an employee must be full-time and work a minimum of 30 hours a week. Employees who reside and/or work outside of California are also eligible to enroll for coverage.

### Coverage Area

The production company is able to provide coverage to employees who work in and outside the state of California.

### Coverage Continuity

Studios are able to offer the same coverage to employees of multiple production companies. Employees who are reassigned to a different production company will experience no change in coverage.

### Why PacFed?

PacFed's team provides consolidated billing, on-site open enrollment, complete member services and direct claims support from a single source. COBRA administration, and compliance, regulatory and fiduciary burdens are shifted from the studio to the private health insurance exchange.
